

## Tahoe Truckee Leadership Team 2003-2004

The leadership team is thirteen individuals who have participated in Adopt-A-Watershed's Leadership Development Program (LDP). This year six attended the Summer Leadership Institute and four attended the Spring Retreat. For Spring Retreat, the team created a portfolio which documents the efforts of themselves and partners in disseminating place-based learning (PBL) and service-learning throughout the region, including documents, photos, diagrams and videos. The team developed a PBL brochure for the Tahoe Truckee region, focusing on local activities, issues and benefits. Development of the brochure involved working with a number of partners and within the team to develop a clear understanding of the team's outreach objectives and target audiences. As a LDP follow-up training, a PBL workshop was offered at Tahoe Lake School to 25 teachers and other educators in the region. The team expended considerably effort in clarify its own governance and objectives, and building strong relationships among team members. Several team members are also on the Tahoe Truckee Service Learning Partnership Management Team.
