Why Collaborate?

A better way to educate
Benefits entire community
Sense of purpose in education, real world application
Avenue for participation, civic involvement
Progressive approach to education reform
Empower youth

What's the problem?

Empowering you the with sense of place so they care about it

How do you get students, adults to wan to care?

School environments need improvement, environmental problems are mounting, community is disconnected...place-based education leverages the nexus from within all three areas to make a positive impact in our watersheds
